| Weight | 0.62Kg |

**About Ciqurix™ FCam Solo Mounting Base**

The versatile, time-saving FCAMS-BASE facilitates a variety of scenarios where a discreet installation is desired. Selected to perfectly match the Ciqurix FCam Solo, the FCAMS-BASE allows side or rear network cable entry via glands or conduit and has sufficient space to house the Ciqurix PoE Splitter if required. If ordered together with the FCam Solo (and PoE splitter if appropriate) then these will be pre-assembled in the factory ready for a simple plug-and-play installation – saving time and cost on site.
